SARATH A

MERN Stack Developer
Thrissur, Kerala | Sarathjithu89@gmail.com | +91 90734 4731 | LinkedIn | GitHub | LeetCode | Portfolio

Professional Summary

Full-stack web developer specializing in the MERN stack, with hands-on experience building and deploying scalable web applications. Skilled in JavaScript, TypeScript, Node.js, Express, React and MongoDB, with working knowledge of WebRTC, Socket.IO, AWS, Nginx and PostgreSQL. Focused on clean architecture, responsive interfaces and real-world performance.

Technical Skills

- **Frontend:** React.js, JavaScript, TypeScript, Tailwind CSS, HTML5, CSS3, Bootstrap, EJS
- **Backend:** Node.js, Express.js, REST APIs, Socket.IO, WebRTC, JWT
- **Database:** MongoDB, Mongoose, PostgreSQL (Neon), MySQL, Redis
- **Auth & Payments:** Clerk, JWT, bcrypt, Razorpay
- **Cloud & Deployment:** AWS EC2, Nginx, Render, Vercel
- **Tools & Concepts:** Git, GitHub, Figma, Blender, MVC Architecture, SOLID Principles

Projects

vidMeet – Real-time Video Conferencing Platform

A full-stack video conferencing platform for low-latency peer-to-peer calls, live chat, meeting history and subscription-based limits.

Key Features:

- Peer-to-peer video meetings with unique room IDs and invite links.
- Real-time chat with unread badges, participant list and persisted history.
- Mic and camera controls, meeting history and participant logs.
- Clerk authentication, webhooks and free/premium plan enforcement.
- Meeting history with participant logs and chat transcripts.

Technologies Used: React, Tailwind CSS, WebRTC, Socket.IO, Node.js, Express, Clerk, PostgreSQL

ZapStore – E-commerce Platform

A server-rendered e-commerce platform for electronics, with a customer storefront, admin dashboard, Razorpay checkout and full order management.

Key Features:

- Product catalog with search, filters, wishlist and cart.
- Razorpay checkout with coupons, offers and wallet credits.
- Customer profiles, orders, returns, referrals and order tracking.
- Admin CRUD for products, brands, categories and inventory.
- Sales reports with charts, plus customer and order management.

Technologies Used: EJS, Bootstrap, Node.js, Express, MongoDB, Redis, Razorpay, AWS, Nginx

Additional Projects

Student Management System (TypeScript, Node.js)

- Backend for managing student records with full CRUD operations.
- Input validation, consistent error handling and a modular repository structure.
- Separated repository, validation and error-handling concerns to keep controllers testable.

To-Do Application (React, localStorage)

- Task management with add, edit, complete and delete flows.
- localStorage persistence, reusable components and conditional rendering.
- A single state tree keeps the interface and persisted tasks in sync after refresh.

QR-Code Generator (JavaScript)

- Front-end tool that generates QR codes dynamically from user input.

Experience

Design Engineer — EPCON Electrical Consulting | 2023 – 2024

Worked on electrical design projects, strengthening attention to detail, structured problem-solving and ownership of complex work.

Education

MERN Stack Development — Brototype | 2024 – 2025
B.Tech, Electrical and Electronics Engineering | 2020 – 2023
Diploma, Electrical and Electronics Engineering | 2017 – 2020
Higher Secondary, Bio-Maths | 2015 – 2017

Soft Skills

- Problem Solving & Debugging
- Team Collaboration & Communication
- Adaptability & Quick Learning
- Time Management & Ownership
