Professional Summary

Full-stack Web Developer specializing in the **MERN stack** with keen interest in developing and deploying scalable web applications. Strong expertise in **JavaScript, Node.js, Express, React, and MongoDB**, with additional knowledge of **AWS, Nginx, and MySQL**. Adept at building **user-friendly, responsive, and secure applications** Passionate about solving problems, optimizing performance, and continuously learning emerging technologies.

Technical Skills

- **Frontend:** React.js, TailwindCSS, HTML5, CSS3, TypeScript, JavaScript
- **Backend:** Node.js, Express.js, REST APIs,Jwt
- **Database:** MongoDB, MySQL
- **Cloud & Deployment:** AWS EC2, Render, Vercel, Nginx
- **Tools & Version Control:** Git, GitHub, Figma, Blender, CAD
- **Concepts:** MVC Architecture, SOLID Principles, Responsive Design

---

Projects

ZapStore – E-commerce Platform

A **feature-rich e-commerce platform** designed for electronic gadgets, implementing complete shopping workflows.
Key Features:

- Product listing, cart management, and order processing.
- Image cropping & zoom for product display.
- Offers, coupons, and discounts functionality.
- Payment gateway integration (**Razorpay**).
- Sales reports with charts & graphs for admin.
- Admin-side management of users, products, and categories.
- Scalable deployment with **AWS EC2, Nginx, and load balancer**.

Technologies Used: Node.js, React.js, Express.js, MongoDB, Bootstrap, JWT, AWS EC2, Nginx

---

Min-projects

Student Management System (TypeScript, Node.js)

- Developed a backend system for managing students using **TypeScript** with Node.js.
- Implemented **CRUD operations** (Create, Read, Update, Delete) for student records
- Includes validation, error handling, and modular repository structure.

To-Do Application (React, LocalStorage)

- Built a **task management app** using React with **functional components** and **hooks**.
- Features include **adding, editing, marking complete/incomplete, and deleting tasks**.
- Integrated **localStorage persistence,state management, component reusability, and conditional rendering.**

QR-Code Generator

- A tool built with **JavaScript** (front-end only) to generate QR codes dynamically based on user input.

Experience

Design Engineer— EPCON ,Electrical consulting , [2023-2024]

Education

Mern Developer- Brototype ,[2024-2025]

Btech— Electrical and Electronics Engineering, [2020-2023]

Diploma— Electrical and Electronics Engineering, [2017-2020]

Higher Secondary— BioMaths [2015-2017]

Soft Skills

- Problem Solving & Debugging
- Team Collaboration & Communication
- Adaptability & Quick Learning
- Time Management & Ownership
